

Are you worried about something your doctor can't help with?

Is later life not what you hoped it would be?

Ask your doctor or practice nurse about:

Improving Health
and Wellbeing for Walsall

The Age UK Walsall Community Partnership Project

The aim is to enable and support older patients to access to a wide range of lifestyle services that will help prevent or delay the need for more acute health and social care services.

The GP Support Workers can:

- Meet with you at home
- Provide information about local groups and services
- Refer you to organisations who may be able to help you
- Recommend services or activities which may help you to stay independent for longer

Our volunteers will call you a few weeks after our visit to find out how you are getting on and to see whether you found our visit helpful.

Please speak to any member of the practice staff about this new service.
